

Better control, alerting and performance management

1 Because Knowledge Genes® map HOW versus WHY, cause-and-effect, from top to bottom of the business - they give you the ideal Business-Intelligence and Performance-Management architecture - an *enterprise-wide metrics framework* that everyone understands...

2 ... and which you can immediately bring to life, immediately implement, via dashboards & alerts - a 'thin layer' that acquires information from multiple sources to give **performance management transparency from root-causes & operational processes all the way up to enterprise goals.**

3 And Knowledge Genes® offer **fast return on investment** - critical Performance Management solutions are typically implemented in less than a month.

Plug-in Applications

Get alerted about the things you really need to know and act upon

The Dashboards & Alerting plug-in provides alerts from underlying systems or other plug-in applications, all in the context of WHAT is being done, HOW, and WHY it's important. ... to request more information, go to www.knowgenes.com/Dashboards_plugin.aspx

Oversee, test and certify what people are doing

Use Knowledge Genes® to define compliant ways of working and then use the integrated Governance, Risk & Compliance Management plug-in to enable risks, regulations, controls, certifications, assessments and other key information to be managed and indexed into these Knowledge Genes®
