

Better knowledge sharing, better process

Imagine the impact if everybody had a shared understanding of exactly **WHAT** they need to do, **HOW** to do it and **WHY** it needs to be done.

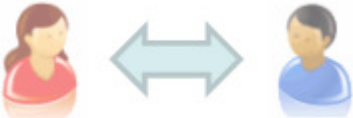

The first question Peter Drucker

"There is surely nothing quite so useless as doing with great efficiency what should not be done at all."

*"The first question in increasing productivity in knowledge and service work has to be: What is the task? What do we try to accomplish? **WHY** do it at all?"*

Knowledge can be quickly understood and replicated with high fidelity

The secret of knowledge sharing is the speed and quality of replication - for us as in naturally occurring processes.

The code of knowledge allows us to codify knowledge so that our best knowledge can be quickly and accurately replicated.

A Knowledge Gene[®] is a component of knowledge on a specific subject.
... to start, visit www.knowgenes.com/SignInSignUp.aspx?action=CreateNewKg

Your Knowledge Genome™ is a collection of all of those Knowledge Genes[®] that you use to survive and succeed as an organization.

And then shared across the enterprise

You can create and share public Knowledge Genes[®] in our global knowledge exchange for free. But if you want to share and collaborate with your colleagues in private or build an enterprise Knowledge Genome[®] (your collection of Knowledge Genes[®]), sign up for a Private Space or Enterprise Space. Knowledge Genes[®] can cope with many tens of thousands of users and you can create categories and set user permissions.

... to learn more, visit www.knowgenes.com/Register.aspx

And of course, you can always use Knowledge Genes[®] with your chosen web conferencing and live chat tools.
